ABOUT IMMIGRATION.

The Opposition papers have been con- when they founded the society. The strained to recognize the wisdom of the term "Royal" was opposed by Mr. S. B. Government's immigration policy; but Dole, but as he stood alone, his opposiwith characteristic unfairness it is sug- tion to the "Royal" appellation was ungested that the proclamation excluding availing. "C. W. A." concludes as fol-Chinese from and after April 1st has not lows: been issaed in good faith. It is of course useless to argue this point with the Opposition press, and demonstrate the untenableness of their position. But a statement of fact will show the public that the Government has been not merely sincere, but successful in its anti-Chinese policy, while providing abundance of labor for the planting interests.

It will be remembered that the Planters' Labor and Supply Company didate for Waimea and Niihau, this abuse brought strong and sustained pressure to of the royal style and allusion to election bear upon the Administration when it gin is specially unfortunate. He was inwas admittedly weak, to induce it to debted to a "Royal Mandate" for letters throw the ports open to unrestricted of denization in 1883, and but for this Chinese immigration, with the intention | special "Royal favor" in his case he would of overrunning the country and reducing not have been qualified to stand as a the price of labor to refused compliance tainly before the election he was not with this request, and instead made reg- averse to "royal favors" if they could be ulations rendering Chinese immigration more difficult. For this the Administration encountered the strenuous opposition of the members of the Planters' Labor and Supply Company, whose only aim or purpose appears to be to secure "cheap labor," and who have no apparent concern for the prosperity and permanence of the native race.

The recent regulation is intended to exclude still more effectively the Chinese labor element, and in this way indirectly to help the native and white labor element in our industrial classes. That it will be evaded in some cases is likely enough. There has never been a law of this kind in operation that has been careverything "royal" or above the common ried out to the letter in all cases, and common sense should teach any one that this must be so. If it be broadly successful that is all that is needed or can be expected. That there are far too many Chinese in the country is admitted by everybody except the Opposition planters and their friends, and it may resigned the Premiership of New South become advisable hereafter to adopt other measures of exclusion.

Japanese immigration has been suc- sufficient reason. Having been defeated cessfully inaugurated by the Government, and the present week has wit- country; but the country pronouncing nessed the arrival of nearly one thousand against him, he necessarily resigned Japs, of whom a large percentage are He had no alternative. This, however, females. There are now nearly three is nothing against him. Leaders of thousand Japanese in the country; and | parties under constitutional government since Mr. Gibson took office, 7,654 Portuguese have been introduced. In addi- change of public opinion. If Sir Alextion to this accession to our population, ander Stuart had been in the enviable the arrival of several hundred Portuguese | position of His Excellency Mr. Gibson may be shortly expected, and this field at the general election, he would to-day of labor supply is to be thoroughly

We have thus two streams of immigration flowing to these Islands outside the Chinese channel, and the successful handling of these people, and their future of the serious accident that has occurred identification with this country, will to the Mariposa's boiler, it is suggestgreatly depend upon the gradual weakening of the hold which the Chinese, through the selfish cupidity of the Opposition, have fastened upon the Kingdom.

ABOUT "FLUNKEYISM" AND THINGS.

"A letter on "Flunkevism," over the initials "C. W. A.," appeared in the "Bulletin" last Monday, in which the writer airs his ignorance and gratifies his spleen. He says:

Is it not something out of keeping with the democratic profession of the owners submitted for their approval, so that any and managers of the Oceanic Steamship Co. that their American built and Ameri can owned vessels should be persistently described as the "Royal Mail Steamers so-and so? And yet that branch of their establishment which holds forth in the P. C. ADVERTISER office in this city invariably refers to those fine ships with the Royal prefix. This is contemptible. This is dunkevism run wild.

"C. W. A." is as usual ill-informed these Islands, boilers are constructed (limited) for the ensuing year: Presiand rude. THE LATEST AMERICAN INVENTION.

THE VICTORY OF ELECTRICITY. Since Electricity has been applied for lighting purposes, all efforts of inventors have been directed to construct a lamp for general domestic use. The reason why this problem has till now not been solved, is that none of the inventors could rid themselves of the idea of gas lighting, and that all have adhered to the system of producing the electricity in some central place, or by large machinery, instead of first laying down the principle that a lamp which should ever become generally useful and popular, must be portable like an oil lamp, and contain the generator of electricity in itself, i. e., in the foot of the

The Norman Electric Light Company has at last succeeded in completely realizing this ideal of electric lighting, and there is no doubt that this most important invention will bring about a complete revolution in all branches of lighting. Our Electric Lamp needs neither machinery, conductors, nor any expensive outlay, and is neither complicated or disagreeable in manipulation; all that is necessary is to refill it every four of five days with acid. The cost of lighting will be as cheap as gas (% cents per hour), and it has before the latter the immense advantage of neither producing heat, smoke nor carbonic acid, owing to which the air is not impured, and remains at the same degree of temperature. It is further, absolutely inodorous, and does not need to be

fire, explosion or suffocation, as in the case of gas, if the key is left open; and it must be conceded that this advantage alone is invaluable. It is further preferable to any known kind of lighting for the following reasons: 1. Its manipulation is so simple that any child can keep it in order. 2. That the lamp is portable, and can be removed like any oil lamp, from one place.

kindled by match or otherwise, but simply by turning the key, thus avoiding all danger of

3. That it neither requires the disagreeable fixing of the wick, or the cleaning of the cylinder, as in the case of oil lamps. 4. That the light produced is a soft and most steady one; that it never flickers, and the flame, though being equal in power of lighting to gas, can be regulated to any degree. 5. That every danger of fire is absolutely excluded, as the light will extinguish im-

mediately, if by any accident the glass surrounding the burner should be broken.

6. That it will burn, even in the strongest wind, completely unaffected, thus being invaluable for illuminations, lighting of gardens, corridors, etc. This lamp is constructed for the present in three different sizes: A, small size. Height of complete lamp, 14 inches; weight, about 5 pounds; for lighting rooms, cellars, storage houses, powder magazines (or similar places where explosives

are kept), coaches, illuminations, gardens, mines or any other industrial purpose. Price, Per lamp delivered free to any part of the world. B, medium size. Serves all domestic purposes for lighting rooms, houses, etc. This lamp is elegantly decorated, and has removable white ground glass globe. Price per lamp (inclusive of bronze foot and globe, richly and elegantly constructed),

— delivered free to any part of the world.

C. grand size for parlor, hall, saloon, public building, etc. The lamp gives a most brilliant and steady light, has large removable white globe, decorated most tastefully, and the workmanship is both first-class and elegant. Price, £4.10. -. Foot of lamp in either bronze, Japanese, faience or silver oxide. Any special size or design made to order. Estimates furnished. All lamps are ready for immediate use, and will be sent, securely packed in strong

wooden box, with printed directions for use, a quantity of chemicals sufficient for several months' lighting, and one extra burner for size A, and two for sizes B and C. The necessary chemicals can be purchased in any drug store, even in the smallest village Every lamp is accompanied by a written guarantee for one year, and will be exchanged, or money refunded if the same should not give complete satisfaction. On all orders for six lamps and above, a discount of six per cent will be allowed. No orders from abroad filled, unless accompanied by a remittance to cover the amount, or first-class references on a New York or Philadelphia house.

The best method of sending money is by draft on New York, which can be procured of any banker, and everywhere, or enclose the amount in bank notes, gold coins or postage All orders, the smallest as well as the most important, will receive the same particular attention, and will be forwarded without delay Our Electric Lamps are protected by law, and all imitations and infringements

TAgents, salesmen on commission, and consignees for our lamps wanted every where. No special knowledge or capital required. A fortune to be made by active persons. THE NORMAN ELECTRIC LIGHT CO.,
